

SunTechnics

Solar energy creates sustainable value.

Solar has many different uses.

Solar fits with all building types.

COMPANY VISION

For every energy demand worldwide we offer the best renewable energy solution.

COMPANY HISTORY

Founded in 1996 by Hans-Martin Rüter, SunTechnics quickly became a European market leader in photovoltaic systems. By the year 2000, SunTechnics proved its dedication to the customer by launching the first complete energy guarantee for its systems. SunTechnics' expansion into the U.S. inspired an even more enhanced portfolio of products and services. Their numerous engineered installations of multiple renewable energies have made SunTechnics an industry leader. Photovoltaics, solar thermal, bioenergy, wind, solar cooling and hybrid systems are among SunTechnics' vast portfolio of renewable energies.

SunTechnics delivers the optimum solution for sustainable energy production at each system installation. Guaranteed yields, system monitoring, and proven reliability are innovative features that contribute to thousands of satisfied customers worldwide.
